Activity 1

Assessment Plan

On the next page, you will find an Assessment Plan for the 2025-26 academic year.

Discuss:

- whether the Assessment Plan is fit for purpose
- what needs to be done to ensure effective implementation of the Assessment Plan.

Assessment Plan

Programme Title	BTEC Ext Cert IT (version 3.1)

Lead Internal Verifier Signature ***			Christine_Skelton@stopford_house_training.org					Date	5 September 2025	
* When planning the units for delivery, it is important to check the rule of combination will be met for the qualification. Towards the front of each programme's specification, you will find a table listing the number and combination of units required for the size of the qualification. Ensure you have considered what is classed as an eligible combination. ** Centres must ensure that the Pearson Set Assignment Brief versions are identified and allocated at cohort level, with all students in a given academic year being allocated the same option. Centres must ensure that these versions are changed each year, moving through all of the options available before any are repeated. Centres are permitted to choose the order that the versions are administered. *** Electronic signatures are acceptable on all assessment and internal verification documentation if there is an audit trail to support its authenticity. This includes a scanned signature or the individual's centre based email address. A font style is not accepted. Please see the Centre Guide to Internal Verification for further details. **** Lead Internal Verifier must authorise any resubmissions. The learner must have met the initial deadline (or an agreed extension deadline) and authenticated their work. The resubmission date must be within 15 working days of the learner receiving the results of assessment which must be within a timely period of the assessment taking place.										

Activity 2

Assessment of Learner Work

3: Website Development

The centre has allocated Version 4 to their cohort this academic year.

A learner has submitted work in response to the Pearson Set Assignment Brief and a team member has now assessed the submission.

Discuss:

- Do you agree with the Assessor's decisions and why?
- Do you agree with the Assessor's feedback and why?

UNIT 3: Website Development

Assignment Title: Build a website in response to a client brief

Pearson Set Assignment Brief

You must have: wireframing tools, software and apps to create visual styles and visual representations, equipment and software to create and prepare assets, software tools to develop a website.

Instructions for teachers

Working through the bank of Pearson Set Assignment Brief versions

- The bank of assignments for this unit comprises 4 Pearson Set Assignment Briefs (versions 1–4) – this document is version 4.
- Centres must ensure that the Pearson Set Assignment Brief versions are allocated at cohort level, with all students in a given academic year being allocated the same option.
- Centres must ensure that these versions are **changed each year**, moving through **all** of the options available before any are repeated.
- Centres are permitted to choose the order that the versions are administered.

Preparation

- Centres must ensure students have access to the following resources to design and develop websites:
 - wireframing tools
 - software and apps to create visual styles and visual representations
 - equipment and software to create and prepare assets
 - software tools to develop a website.
- No adaptation of this Pearson Set Assignment Brief is permitted.

Conditions of assessment

- Following the preparatory and planning work, tasks may be completed without direct supervision, outside of the classroom.
- Centres must ensure that there is sufficient supervision of students to enable work to be authenticated. Students must complete an authentication sheet and submit this along with their work.
- The estimated hours stated for completion of this Pearson Set Assignment Brief is 15 hours, including supervised and unsupervised time. Whilst this duration is intended to be used for guidance only, it should be used as an indication of how long students should spend on the assignment.
- Teachers are not permitted to provide feedback to students about how to improve their work or guide them to solutions to any questions or problems in the tasks.

Outcomes for submission

- Students are required to complete, and submit evidence for all tasks. Information regarding evidence requirements is presented within each task.

Instructions for students

You must carefully read the Pearson Set Assignment Brief.

This Pearson Set assignment brief will consist of 3 tasks.

You must submit evidence for each of the tasks.

You must work independently and must not share your work with other students. All evidence must be your own. You must complete an authentication sheet and submit this along with your work.

Any sources of information, ideas, text, audio and/or visual assets created by others that you include in your work must be clearly identified and referenced including the source of the material. Using the work of others as your own or without proper acknowledgement is considered plagiarism and can result in disqualification from the assessment.

You may ask your teacher for support if you have questions about the requirements of tasks, what evidence you need to produce and any resources you are allowed to access such as internet to source audio/visual content. Teachers cannot give you feedback about how to improve your work or guide you to solutions to any questions or problems in the tasks.

You must ensure that the images/scans, audio or video files you use as evidence are clear and of good quality, and clearly show the quality/nature of the work being demonstrated.

You must ensure that digital files, if produced, are saved in an accessible format that does not require specialist software to access.

Introductory context

Produce a retro entertainment website. The aim of the website is to introduce an audience of specific 17- to 23-year-olds to entertainment from the past. You must select a form of entertainment, such as music, games, film, television.

The website must be responsive to mobile devices and include:

- three pages
- drop-down menus
- information about your selected entertainment from the past
- an accordion
- external links to relevant websites
- a form to request specific content
- modal images
- video content with controls
- search functionality
- accessibility features.

Tasks

Task 1

Explore the purposes and principles of website development.

- You must establish the requirements of the given client brief.
- You must conduct research into:
 - existing websites that serve the same purpose as the client brief and select examples to support your planning
 - legal and ethical constraints.
- You should use your knowledge of website development principles to analyse how your chosen websites meet their purpose and appeal to their intended audience.
- You should use your research outcomes to develop ideas for content to meet the client's requirements and explain how the content will meet legal and ethical constraints.
- You must produce a detailed and annotated site map to demonstrate how your proposed website will meet the client's requirements.

Checklist of Evidence Required

Produce:

- an annotated site map
- one of the following:
 - a written response with supporting images
 - an edited audio or video recording
 - presentation slides/slide deck with speaker notes.

Assessment criteria for this task

Pass	Merit	Distinction
A.P1 Undertake research which shows adequate understanding of how the principles of website development are used to meet a specific purpose, using partially relevant examples.	A.M1 Undertake research which shows a good understanding of how the principles of website development are used to meet a specific purpose, using mostly relevant examples.	A.D1 Carry out effective research to demonstrate a thorough understanding of the principles of website development and how to comprehensively meet the client's requirements, using pertinent examples.
A.P2 Produce a site map that partially meets the client's requirements.	A.M2 Produce a site map that mostly meets the client's requirements.	

Task 2

Use web design skills and techniques to plan a website in response to a client brief.

- You must create the following designs for your website:
 - visual representations of the web pages
 - a wireframe for each web page
 - the visual style of the website.
- You should review the fitness for purpose of your designs and make improvements to your designs based on the outcomes of the review process.
- You must use asset management techniques to create, source, prepare and manage the assets for your website.

Checklist of Evidence Required

- Wireframe for each web page.
- Visual designs for the website.
- Visual representations of the web pages.
- Original and sourced assets.
- Evidence of asset management.

Assessment criteria for this task

Pass	Merit	Distinction
B.P3 Produce adequate wireframes and visual designs for a specific purpose. B.P4 Use asset management techniques to develop assets that partially meet the client's requirements.	B.M3 Produce mostly effective wireframes and visual designs for a specific purpose. B.M4 Use asset management techniques to develop assets that meet most of the client's requirements.	B.D2 Make effective use of website design skills to develop designs and assets that comprehensively meet the client's requirements.

Transferable skills

By meeting the Pass grade criteria in this task, you will have demonstrated the following transferable skill:

Solving problems – Creativity and innovation

Task 3

Develop a website in response to a client brief.

- Use your site map, designs and assets to develop a website that meets all the client's requirements.
- You must use website development tools, techniques and processes to create your website.
- You must engage in a testing and review process that includes:
 - functionality testing
 - usability testing
 - making any required refinements.

Checklist of Evidence Required

- Evidence of:
 - engagement with website development tools, techniques and processes
 - functionality and usability testing
 - the outcomes of the self-review process.
- The final website. The web pages must be viewable in common web browsers.

Assessment criteria for this task

Pass	Merit	Distinction
C.P5 Use tools, techniques, processes and testing to produce a website that partially meets the client's requirements.	C.M5 Use tools, techniques, processes and testing to produce a website that meets most of the client's requirements.	C.D3 Use tools, techniques, processes and testing to produce a website that comprehensively meets the client's requirements.

Synopticity

This task includes synoptic assessment. To complete this task learners are expected to draw from the knowledge and understanding learned in Unit 1 for the following content areas:

Content area B

Transferable skills

By meeting the Pass grade criteria in this task, you will have demonstrated the following transferable skill:

Solving problems – Creativity and innovation

Learner Work

Task 1

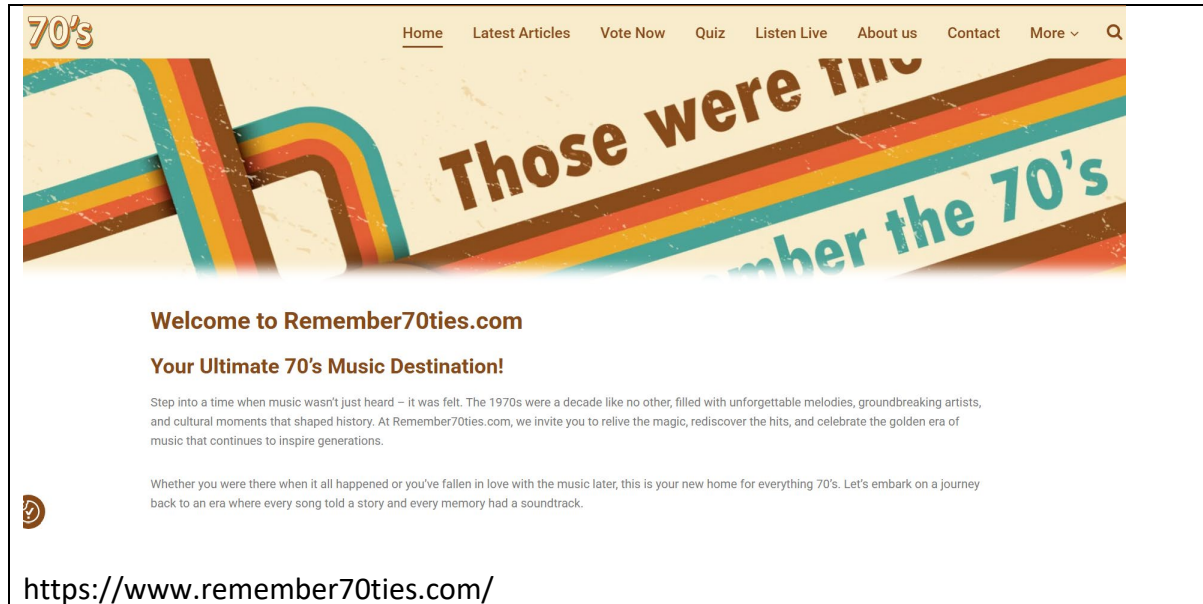

Requirements of the client brief.

I need to design a retro entertainment website that does the following stuff.

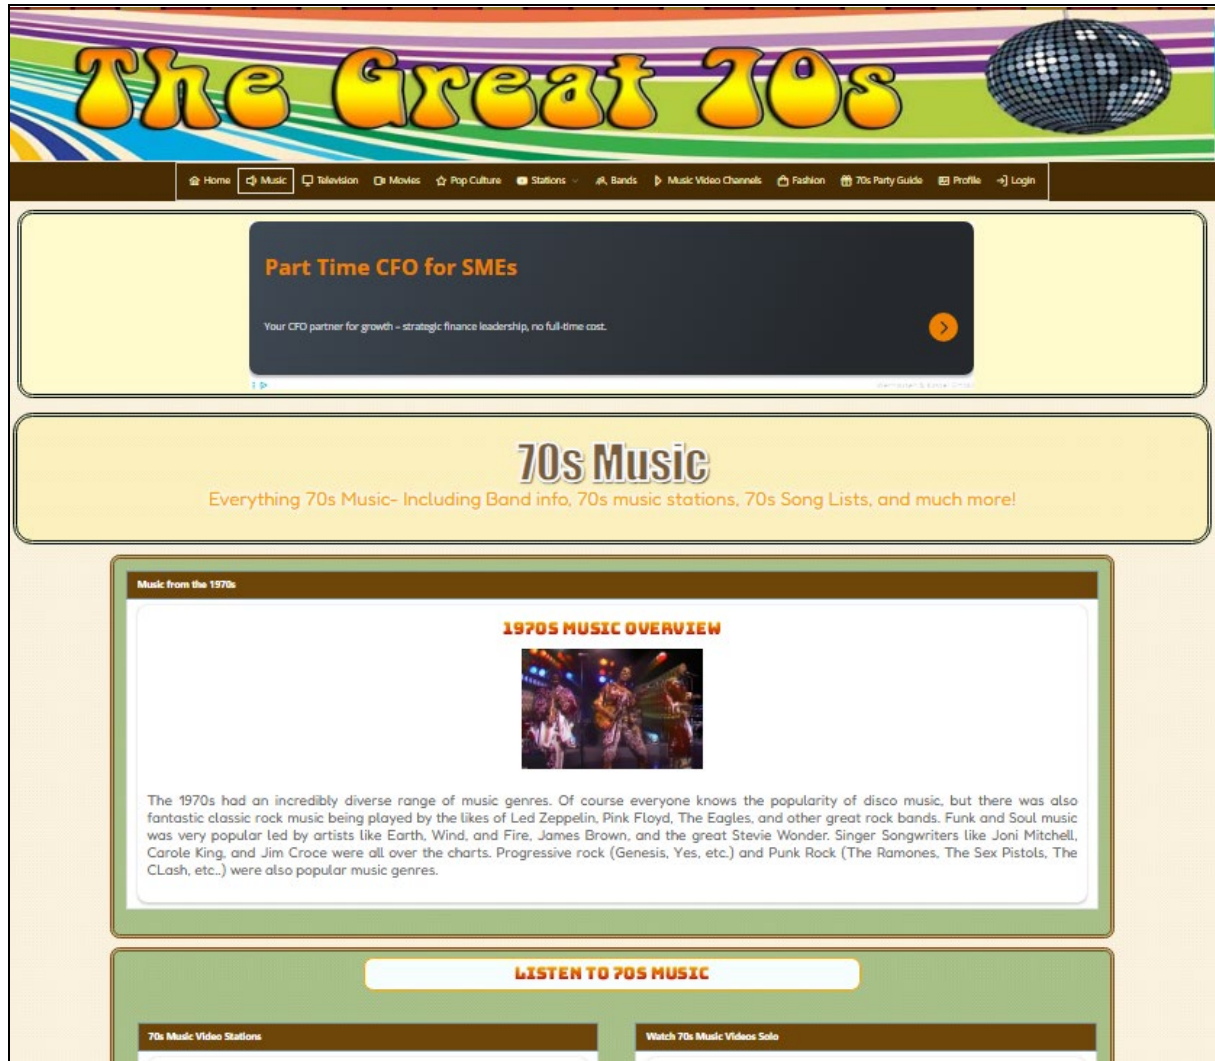

- introduces an audience of 17- to 23-year-olds to 1970s music.
- be responsive to mobile devices
- it must include:
 - three pages
 - drop-down menus
 - information about 1970s music
 - an accordion (which is quite musical init 😊)
 - external links to relevant websites
 - a form to request content like music from a fave band
 - modal images
 - video content with controls to watch videos of bands
 - search functionality to find things
 - accessibility features like alt text and big buttons and easy to read fonts

Existing websites

I have done some research about existing websites that do the same thing as my one will do. They have some things in common that I might be able to use to get ideas for my own website.

Clear Purpose	PROS! Instant understanding and engagement CONS! Menu clutter may confuse users
Usability & Navigation	PROS! Quick access via search and labels CONS! Repetitive menu structures
Mobile Responsiveness	PROS! Nostalgic visual appeal CONS! Layout overcrowding on small screens
Community Engagement	PROS! Interactive polls and social integration CONS! Low retention within site
Content Quality	PROS! Structured, rich article content CONS! Visual clutter makes it difficult to read
Brand Consistency	PROS! Immersive era representation CONS! Repetitive imagery may tire interest
Performance	PROS! Site is quite smooth and works well CONS! Potential slowdowns from heavy images
Summary Remember70ties.com is a really good resource for 1970s culture. The design is effective and is detailed and visually appealing. There is also some interactive content to look at and listen to which is nice. The site layout and retro design make it a pleasant and welcoming site for anyone wanting to explore the decade and find out about what life would be like if you woke up back in time.	

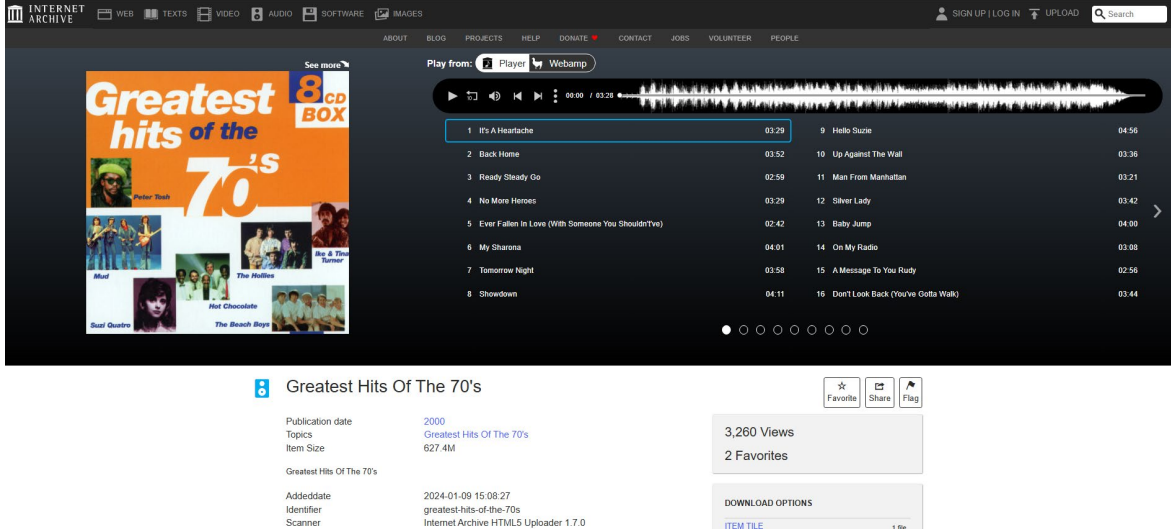

<https://thegreat70s.com/70s-pop-music.html>

Purpose & Content	PROS! Clear mission, broad 70s music coverage CONS! Dense layout, repetitive copy
Navigation	PROS! Intuitive menu hierarchy CONS! No mobile collapse, redundancy
Visual Design	PROS! Nostalgic imagery & emotional appeal CONS! Large unoptimized images, missing alt text
Responsive Performance	PROS! Responsive layout CONS! Slow load, horizontal scroll on mobile
Interactivity	PROS! Chat, stations, can fave features CONS! Repetitive UI copy, unclear functionality
Accessibility	PROS! Structured headings CONS! Poor alt text, no ARIA/keyboard navigation
SEO	PROS! Keywords, semantic elements CONS! Duplicate content, missing metadata
Legal Transparency	PROS! Policies included CONS! No cookie consent, GDPR indications

Summary

TheGreat70s.com provides 1970s pop music content, including interactive video clips, decade-specific song lists, American music charts and biographies of artist who were popular back then. The site uses a structured layout that has intuitive navigation which makes it really easy to use. Its design has retro elements and community features about things from the olden days.

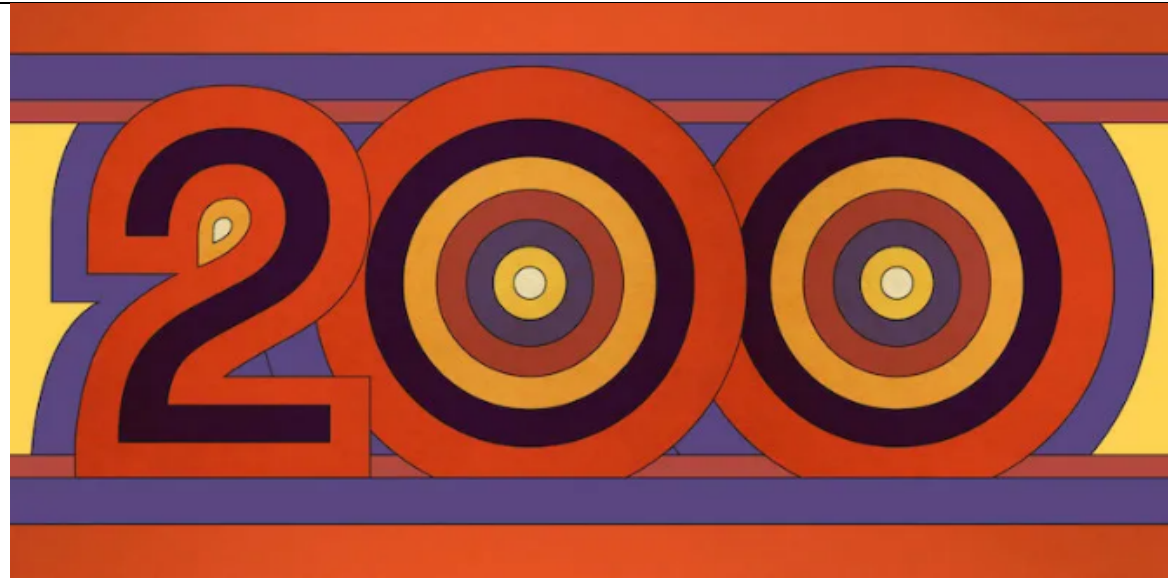

<https://archive.org/details/greatest-hits-of-the-70s>

Purpose-driven	PROS! Quick playback and downloads CONS! No contextual or historical info for deeper engagement
Mobile usability	PROS! Responsive layout, fast performance CONS! Difficult to navigate on a mobile
Accessibility	PROS! Basic player functionality CONS! No alt text and labels are hard to read
Navigation	PROS! Simple, uncluttered interface CONS! Lack of structure makes it confusing
Performance	PROS! Fast loading despite heavy content
Branding	PROS! Clean, distraction-free design CONS! Doesn't look like to 70s

Summary

The "Greatest Hits Of The '70s" on Archive.org has free streaming and downloads of 70s music, for old people who are fans of classic archives. The website is functional but the design and layout of the site is basic which will suit oldies like Mr Samuels. I think it isn't very good because it doesn't have modern browsing features and the accessibility and song information could be much better.

LISTS & GUIDES

The 200 Best Songs of the 1970s

From 10cc to XTC and from punk to prog to ambient to disco, our list of the greatest songs from one of music's greatest decades.

By Pitchfork

August 01, 2016

The 1970s was arguably the single decade of the 20th century when recorded music was most central to culture. There were, of course, fewer kinds of media competing for the average consumer's time—television meant just a handful of channels, video games were the size of refrigerators and could be found in arcades. As the used vinyl bins of the world are still telling us, records were the thing. Labels were flush with cash, sales of LPs and singles were brisk, and record stores were everywhere. Home stereos were a standard part of middle-class culture. Analog recording technology was at its zenith, FM radio was ascendant, and the AM dial still focused on music. The children of the baby boom were coming into their late twenties and thirties—young enough to still be serious music consumers, but old enough to have their own generation of children who were starting to buy music.

And then there was the music itself. Disco, an entire cultural movement fueled by a genre of music—with massive impact on

<https://pitchfork.com/features/lists-and-guides/9935-the-200-best-songs-of-the-1970s/>

Content Structure & Organization	PROS! Clear, consistent formatting helps users read and engage deeply CONS! Long single page layout, lacks navigation tools
Responsiveness & Mobile Optimization	PROS! Accessible on mobile devices without zooming or horizontal scrolling CONS! No quick navigation tools
Visual Design & Accessibility	PROS! Easy to read, good contrast and large fonts CONS! No alt text for accessibility
Performance & Loading Times	PROS! Fast loading speed CONS! Page lag due to amount of content on each page
User Interaction & Feedback	PROS! Easy to use with simple navigation CONS! No embedded music or video like I need to include in my site
SEO & Discoverability	PROS! Easy to find website CONS! No internal links, no summary index. Hard to navigate

Summary

Pitchfork's "200 Best Songs of the 1970s" is effective because it is a good site with a fab selection of songs that have a commentary to explain what they mean – good job for some of them they are mad. The clear layout, organised rankings and built in listening features help make an engaging experience for visitors to the site. It could be more accessible to appeal to a wider audience including oldies and my bro.

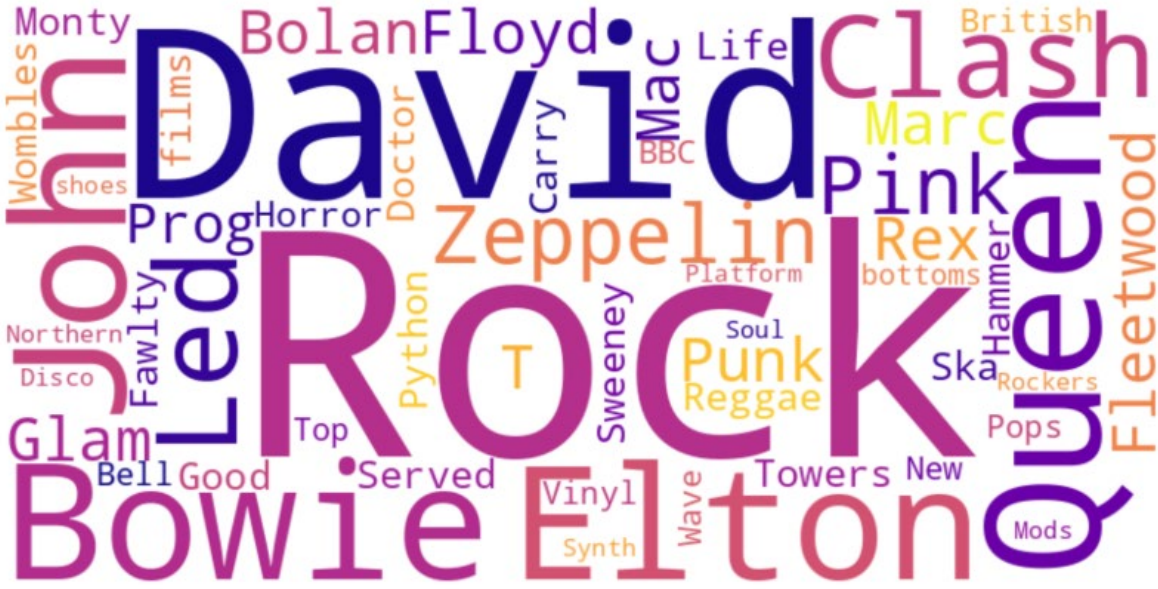

Extra research

As well as looking at other websites I have done some more research about the 1970s that will help me to design my website. I used the internet to produce a moodboard related to music.

This helps me to think about the colours that were popular in the 1970s and the fonts that were used.

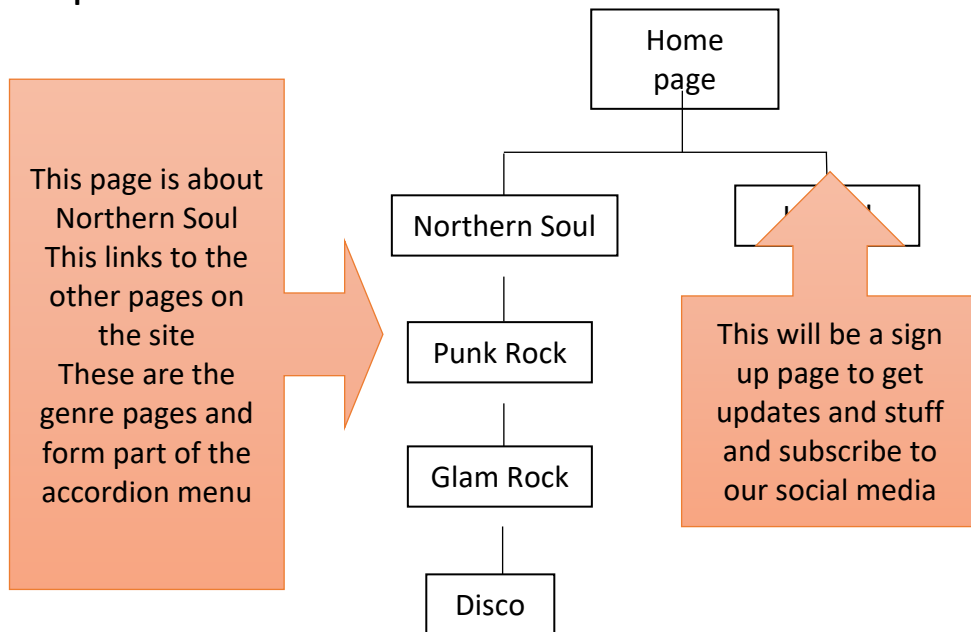

I have also searched for a wordcloud to show me some of the more popular musicians in the 1970s that I could include on my website. There are some musicians I have heard of which is good and I could include them because I know a bit about them from films I have streamed.

I have also used AI to find out about the colours that were popular. It looks like there was a lot of orange and brown in the 1970s so I could use these colours for my website.

Site map

The pages on the left will also be in the accordion menu so that you can click on them to get to the specific page. The site will have information about the music, styles, fashion, youth culture and other things which are of interest about the 70s. There will be images and links and maybe some video if I can link to them that is copyrite free.

Legal and ethical constraints.

I'm creating a website about 1970s British music, and while it's an exciting project, I know there are a few legal and ethical things I need to keep in mind. Even though the music is very old, most of it, like the tracks, lyrics, album art and photos, is still under copyright, so I can't just upload it without permission. Instead I will embed stuff from places like YouTube or Spotify since they've already sorted the rights.

I need to be careful using band logos and names because they might be trademarked, and I don't want it to look like my site's officially connected to any artists so I don't get sued.

I want everything on the site to be accurate and respectful, especially when talking about genres like glam rock or punk — it's important to show the history properly. I'm also making sure the site is accessible and meets web content accessibility guidelines. I will could use easy-to-read text, alt text on images, keyboard inputs, transcripts and a layout that works on mobiles too.

When it comes to using bits of content, I'll stick to fair dealing rules — using only small parts for things like reviews or research and always giving credit. Basically, I want to build something that's fun and informative but also be fair, respectful and legal.

I will also need to consider GDPR as it is a website and all websites must comply with data protection laws and stuff like that when it comes to cookies and other stuff. This is needed because I have to include a request form so people can request stuff to listen to.

Task 2

I have decided to call my website Music with Flares. This is because big trousers were popular in the 1970s and they were called flares.

I have used online tools to design a logo/banner for the website.

This banner meets the client brief because they want something to represent 1970s British music. There is a lot of brown in the image, as I found in my research, and lots of flowery images.

Home Page

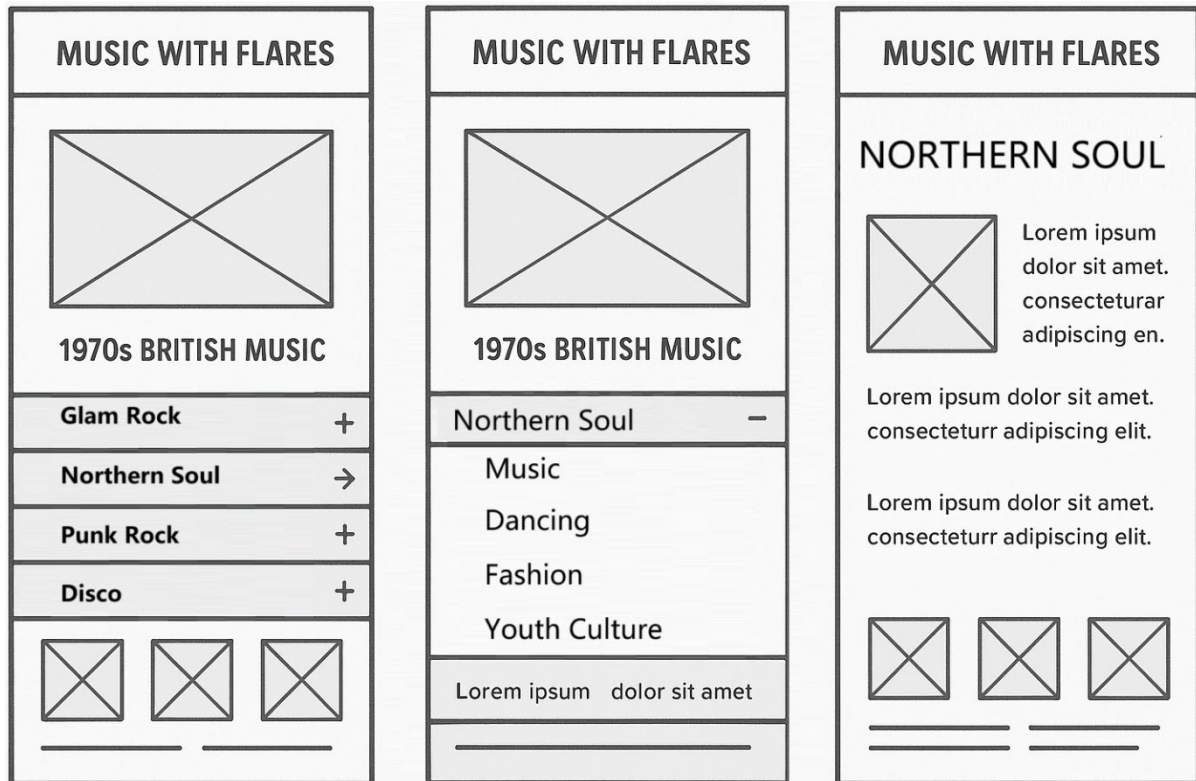

- **Accordion Section** in the “Feature Tiles” area: Each genre (Glam Rock, Northern Soul, Punk Rock, Disco) expands to show a short introduction and the top three artists/albums.
- **Extras:** I could add an “Explore More Eras” accordion near the footer for links to late '60s or early '80s if the client wanted this.

Artists Page

- **Sidebar Accordion Menu:** Filters such as *Genre*, *Debut Year*, and *Band vs. Solo* neatly collapse into labelled dropdowns.
- **Each Artist Card** could have a mini accordion: Clicking “More Info” reveals a short biography, top albums, and influences.

3. Timeline Page

- **Main Timeline** becomes an accordion: Each year (1970–1979) is a clickable dropdown that reveals key events, albums, and bands for that year.
- “Did You Know?” trivia could be integrated into small accordion toggles to avoid clutter.

Design details

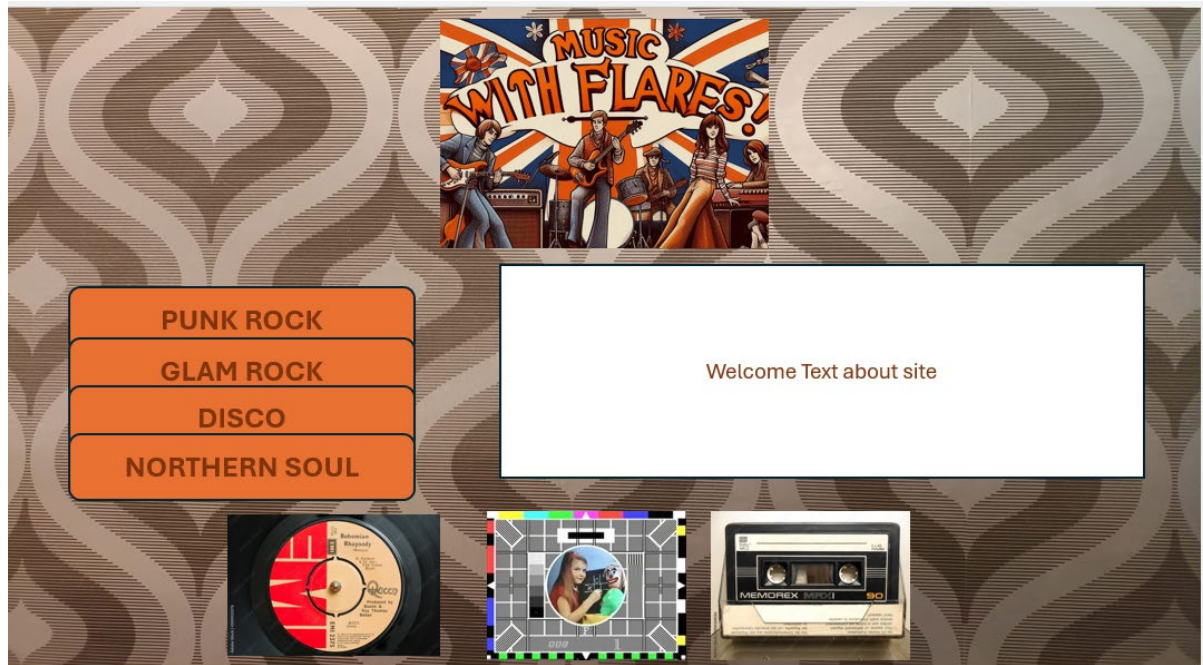

Fonts

- **Style:** I will use a sans serif font for the main text because it is easy to read and accessible to everyone.
- **Size:** I will use something like a 14 or 16 size font
- **Spacing:** 1.5 line spacing will make it easy to read.
- **Colour:** words need to stand out so I will use HEXcode #f66a00 on the accordion links.

Background

- The background will be HEXcode #ff7c3c.
- The hover on the accordion will be HEXcode #ffa500.
- I will also use HEXcode #9e4a00 for outlines of boxes and buttons

This is my mock up of the home page

The wallpaper is a photograph from my granny's back bedroom which has been there for ever.

She told me about cassettes and records and also the test card girl so I have included these.

My granny said that the big white text box looked silly and was a waste of space. I told I would change it and also amended the images at the bottom of the page. She said "that's the first sensible thing you've said since you got here luv". Not sure what to make of that!

The box now looks better and the accordion menu is aligned better. The images at the bottom are all aligned the same now.

Northern soul page

MUSIC WITH FLARES!

1970s British Music
Northern Soul

Explore the energy of Northern Soul. From Jimmy Radcliffe to R. Dean Taylor, this genre got everyone dancing and introduced music of black origin.

Keep the Faith

This text window will be used to add lots of details about Northern Soul including the styles, the music, dancing and youth scene.

Functional testing

Test plan

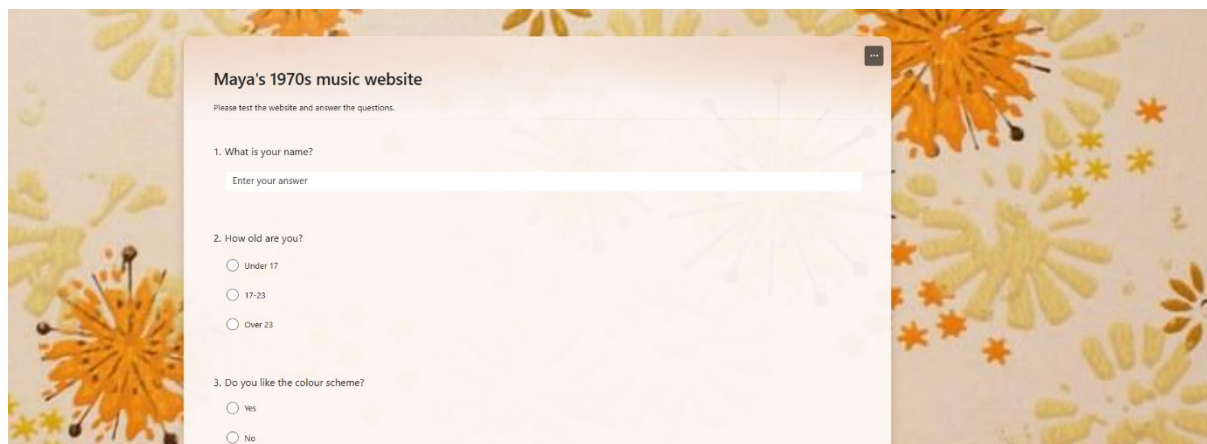

Description	Test data	Expected outcome	Actual outcome	Comments
Navigation to punk page	Click on link	Navigation to punk page	Link worked	Music with Flares Punk Rock Explore the rebellious energy of 1970s British Punk Rock. From The Clash to The Sex Pistols, this genre reshaped music and youth culture. © 2025 Music with Flares
Navigation to glam page	Click on link	Navigation to glam page	Link did not work	 File not found It may have been moved, edited, or deleted. ERR_FILE_NOT_FOUND I need to fix the broken link by checking the address is correct.
Navigation to disco page	Click on link	Navigation to disco page	Link worked	
Navigation to soul page	Click on link	Navigation to soul page	Link worked	

Different screen sizes	Try different window sizes	Images and text should all be clear	Image bar does not look right and needs to be resolved so that the images change in proportion	
Optimise for mobile		See how it looks on a mobile	Not had chance to host on server yet to check	

I have tested the links in the accordion and they take me to the pages that they should do. If I click disco it takes me to the disco page.

Usability testing

I produced a form to get the opinions of other people about my website. I asked classmates, friends, family, Mr Samuels and My Symonds (because they are very old) to fill out my survey and ask questions to find out what they like, what they don't like and what I can improve on.

Maya's 1970s music website

Please test the website and answer the questions.

1. What is your name?

Enter your answer

2. How old are you?

☐ Under 17

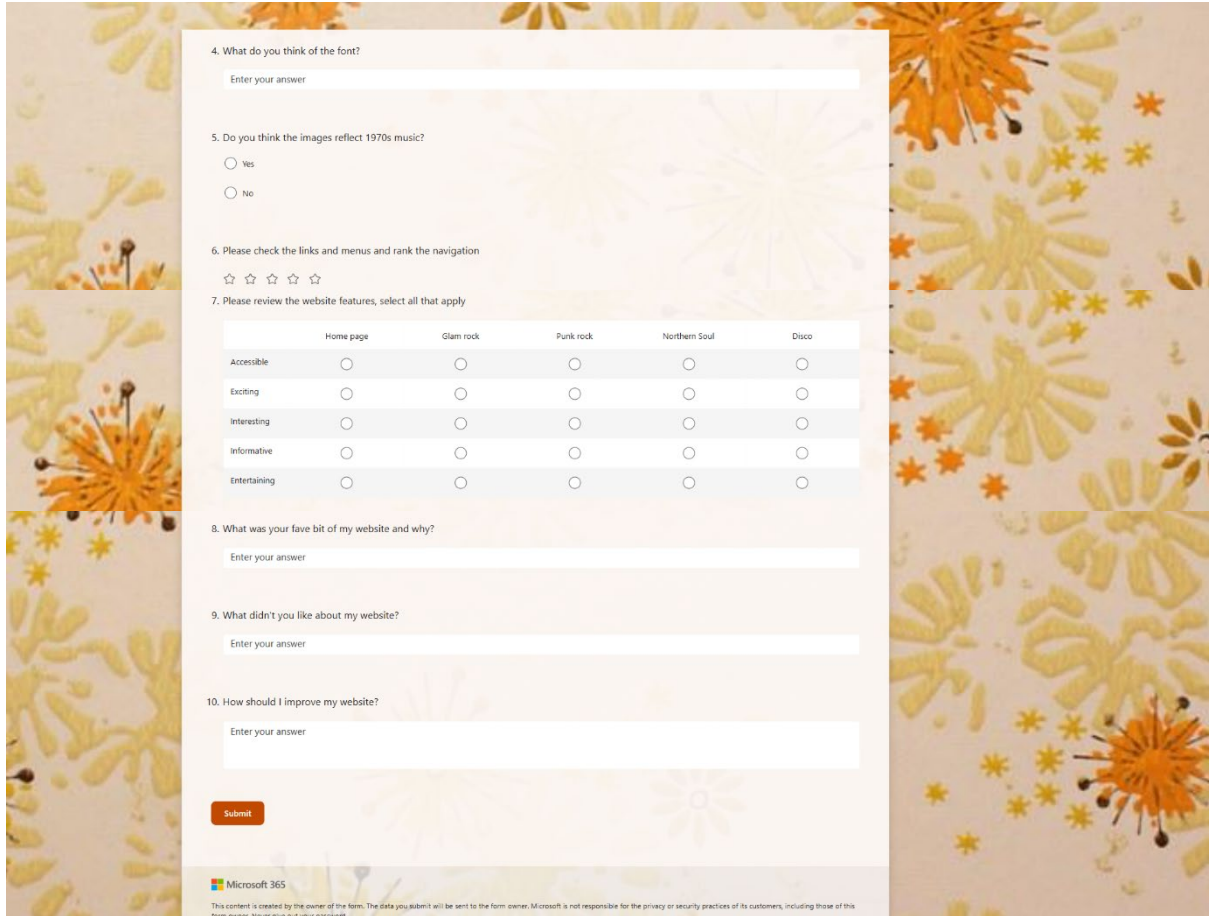

☐ 17-23

☐ Over 23

3. Do you like the colour scheme?

☐ Yes

☐ No

4. What do you think of the font?

Enter your answer

5. Do you think the images reflect 1970s music?

☐ Yes

☐ No

6. Please check the links and menus and rank the navigation

My Self Review of Music With Flares!

"Music With Flares" has a homepage that I think really captures the 1970s British music scene and fashion, especially Northern Soul. It uses bright retro visuals like a Union Jack backdrop and flared trousers. It sets a clear theme and uses the powerful slogan, "Keep the Faith," to connect with fans of old music.

Although the visual impact is strong and I think there is a lot of potential, the site would need some improvements if it was a real site. Some of the text is hard to read against the background colour. I could have chosen a different 1970s colour like yellow or beige instead of brown. I didn't have time to put on a really clear navigation menu. I also think there

should be better accessibility for mobile and screen readers. If I had more time I could have included more content and added links to make the site even more user-friendly and informative than it already is. If it was really popular I could add food from the 1970s like Smash, Prawn Cocktail, Spaghetti Hoops and Arctic Roll, TV programmes too like Camberwick Green and Play School and other icons like an Austin Allegro, 8 track car radios and crochet clothes like my auntie Annie said she had to wear.

Quotes

My granny says that some of the text is hard to read because of the colour and contrast. I need to make this bigger and brighter so that it is visible.

Mr Symonds remembered having a pair of trousers like the one in the banner image (he still wears them when he teaches us sometimes)

Mr Samuels loved the brown background it took him back to 1973.

My sister Lida who is 21 said she thought it was brilliant.

My brother Moh said it was a bit random but is creating his own playlist so I think he likes the concept.

Assessment Record – First Submission

Programme Title	AAQ IT	Learner Registration Number	KJM21211
		Learner Name	Maya Roy
Assignment Title	Website development	Assessor Name	Tyler Samuels
Unit / Component Number and Title	Build a website in response to a client brief		
Deadline	20 March 2026	Date Submitted	20 March 2026
Has an extension to the deadline been approved by the Assessor due to extenuating circumstances?			N/A
Targeted Criteria	Criteria achieved	Assessment comments	
A.P1, A.P2, A.M1, A.M2, A.D1	DISTINCTION	Well done. You have conducted accomplished research to inform your planning.	
B.P3, B.P4, B.M3, B.M4, B.D2	DISTINCTION	Even better	
C.P5, C.M5, C.D3	MERIT	Good work Maya, you have used a range of tools to produce a website that functions and meets most of the client requirements. Try to include more details of the sources you have used for the additional images. Well Done for producing an interesting website!	
General comments			
A good attempt. Well done and I love the music, takes me back to my youth in Hyde.

Internal Verification - Assessment Decisions

A team member has submitted Learner work for Internal Verification.

Do you agree with the Internal Verifier's decisions and why?

Internal Verification - Assessment Decisions

Programme Title:		Pearson Level 3 AAQ BTEC National in Information Technology (Extended Cert)			
Unit/Component Number and Title:		3: Website Development			
Assessor Name:		Tyler Samuels		Internal Verifier Name:	Jean Hunt
Assignment title:		Build a website in response to a client brief			
Name of Learner (If a larger sample is required, please add rows or use additional sheets)	Submission Type (First, Resubmission, Retake)	List which assessment and grading criteria the Assessor has awarded. Please state specific criteria and not an overall grade	Assessment Decision Accurate (Y/N)	List the assessment and grading criteria where inaccurate decisions have been made	State why the assessment decision is inaccurate.
Maya Roy	First	A.P1, A.P2, A.M1, A.M2, A.D1, B.P3, B.P4, B.M3, B.M4, B.D2, C.P5, C.M4	NO	A.D1	Bit generous, annotations are limited.
INTERNAL VERIFIER CHECKLIST					Y/N
Has every learner and the Assessor confirmed the authenticity of the evidence? *					Y
Is there evidence of collusion or plagiarism?					N
Does the assessment feedback to each learner:					N
- Link to relevant assessment criteria? - Justify each assessment criterion awarded? - Provide appropriate guidance to the learner without giving specific actions for improvement?					
GENERAL COMMENTS (if appropriate)					

Generally well assessed. You need to improve feedback because it is inconsistent.

Any actions required must be reviewed across the whole cohort.

Action Required	Target Date for Completion	Date Action Completed
Reassess Learning Aim A for all students awarded A.D1	24 April 2026	
I confirm that the assessment decisions are accurate, there is no evidence of assessment malpractice and any action points have been addressed and completed in respect of the whole cohort.		
Internal Verifier signature	lean.hunt@stopford.house.training.org	Date 27/3/26
Assessor signature	<i>Tyler Samuels</i>	Date 27/3/26
Lead Internal Verifier signature (if appropriate)		Date

* Electronic signatures are acceptable on all assessment and internal verification documentation if there is an audit trail to support its authenticity. This includes a scanned signature or the individual's centre based email address. A font style is not accepted. Please see the Centre Guide to Internal Verification for further details.

Unit 3: Website Development

Level: 3

Unit type: Internal

Guided learning hours: 60

Unit in brief

Students will investigate fundamental principles in website development. They will design and develop a website in response to a client brief.

Unit introduction

Website development skills are more essential than ever if you want to be noticed, reach your goals and generate interest in today's sophisticated, competitive and dynamic online environment. Modern lifestyles are digitally driven and as a website developer you must combine different tools and techniques to capture and maintain the user's interest. Website developers need to understand and acquire the necessary skills to find solutions to a variety of scenarios and problems.

In this unit, you will explore how existing websites use the principles of website development to appeal to their intended audience and meet their specific purpose. You will plan, design and develop a website in response to a client brief by applying website development tools, techniques and processes. You will also reflect on the usability, functionality and fitness for purpose of the website using a testing and review process.

Many software developers, database experts and systems managers need web-client development skills as an integral part of their overall portfolio of expertise. This unit will benefit you to progress on to information technology courses in higher education.

Learning aims

In this unit you will:

- A Understand how the principles of website development are used to create effective websites.
- B Explore website design skills and techniques to meet client requirements.
- C Develop a website to meet client requirements.

Summary of unit

Learning aim	Key content areas	Assessment approach
A Understand how the principles of website development are used to create effective websites	A1 Purpose and principles of websites A2 Planning a website in response to a client brief	Pearson-Set Assignment Brief Task 1: Conduct research to analyse how the principles of website development are used to meet a specific purpose and develop ideas and plans to meet a client's requirements.
B Explore website design skills and techniques to meet client requirements	B1 Website design B2 Asset management techniques	Pearson-Set Assignment Brief Task 2: Produce designs and assets for a website to meet a client's requirements.
C Develop a website to meet client requirements	C1 Common tools and techniques to produce a website C2 Website development processes C3 Testing	Pearson-Set Assignment Brief Task 3: Develop a website to meet a client's requirements.

Content

The essential content is set out under content areas. Students must cover all specified content before the assessment.

Learning aim A: Understand how the principles of website development are used to create effective websites [EL-SRS]

A1 Purpose and principles of websites

- Purpose and audience:
 - o purpose of websites, to include:
 - eCommerce
 - to provide information
 - to promote products or services
 - to provide entertainment
 - o target audience, to include:
 - demographics
 - user personas.
- Principles of website development:
 - o page layout, to include:
 - F-Shaped pattern
 - Z-shaped pattern
 - grid layout
 - visual hierarchy
 - grouping elements
 - separating content
 - unconventional layouts
 - o navigation, to include:
 - fixed/sticky navigation bars
 - vertical navigation
 - hamburger menu
 - logical navigation
 - o content, to include:
 - written content
 - visual content
 - calls-to-action
 - o design, to include:
 - typography
 - colour scheme

- o user experience:
 - accessibility, to include:
 - § colour contrast
 - § colour combinations
 - § closed captions, transcripts
 - § keyboard-only navigation
 - § breadcrumbs
 - § customisable features
 - consistency, to include:
 - § branding
 - § page layout
 - § design
 - § User Interface (UI) elements
 - user-friendly, to include:
 - § simplicity
 - § intuitive
 - § engaging
 - § responsive
 - use of motion and movement, to include:
 - § micro-interactions
 - § animation
 - § parallax scrolling
 - § image sliders
 - § purpose of motion
- o dynamic websites, to include:
 - customised user experience
 - controlled access to content
- o cross-browser compatibility, to include:
 - reducing discrepancies in different browsers
 - mobile compatibility
- o search engine optimisation.

A2 Planning a website in response to a client brief

- Establishing the client's requirements:
 - o purpose, to include:
 - problem to be solved
 - key messages
 - user motivations and goals
 - o intended audience
 - o technical requirements

- Research to identify new ideas:
 - o existing websites
 - o content ideas
 - o available resources
 - o legal and ethical constraints:
 - copyright
 - data protection
 - digital accessibility
 - inclusive and diverse content and representations
- Structuring the website:
 - o site map:
 - number of pages
 - content and features
 - site navigation.

Learning aim B: Explore website design skills and techniques to meet client requirements

B1 Website design

- Creating wireframes:
 - o wireframing tools, to include:
 - sketching on paper
 - graphic design software
 - UX design software
 - wireframing app
 - o wireframing techniques, to include:
 - hierarchy of page elements
 - balance of content
 - grouping elements
 - aligning elements
 - accurate dimensions.
- Design ideas:
 - o visual style, to include:
 - colour palette
 - branding
 - typography

- Reviewing fitness for purpose:
 - o quality, to include:
 - clarity
 - detail
 - o user experience
 - o meeting client requirements.

B2 Asset management techniques

- Creating assets:
 - o writing headlines and copy, to include:
 - short sentences
 - short paragraphs
 - avoiding jargon
 - appropriate mode of address
 - o visual assets, to include:
 - image editing techniques
 - image manipulation techniques
 - vector graphic drawing techniques.
- Sourcing assets, to include:
 - o written copy
 - o stock images
 - o icons
 - o video.
- Preparing assets, to include:
 - o trimming video
 - o compression
 - o file formats.
- Managing assets, to include:
 - o logical folder structure
 - o naming conventions.

Learning aim C: Develop a website to meet client requirements [MY-TPR]

C1 Common tools and techniques to produce a website

- Hypertext Markup Language (HTML):
 - o navigation, to include:
 - menus
 - internal and external links
 - anchors

- o adding content, to include:
 - text
 - images
 - video
 - tables of information
- o forms.
- Cascading Style Sheets (CSS):
 - o styling, to include:
 - colour
 - web typography
 - text formatting
 - links and buttons
 - tables
 - forms
 - o page layout, to include:
 - CSS box model
 - responsive layouts, to include:
 - § CSS media queries
 - § layout tools.
- Function of JavaScript in website development, to include:
 - o displaying images:
 - sliders
 - gallery
 - o displaying information:
 - accordion
 - tabs
 - modal box
 - filtering information
 - o animation:
 - hover effects
 - transitions
 - animated logo
 - motion
 - o search functionality
 - o shopping cart
 - o interactive maps
 - o video, to include:
 - controlling video
 - video backgrounds.

C2 Website development processes

- Accessibility:
 - o features, to include:
 - alternative tags
 - zoom features
 - text-to-speech
 - o standards, to include:
 - Web Content Accessibility Guidelines (WCAG)
 - World Wide Web Consortium (W3C) standards
 - HTML5 standards
 - o semantic HTML.
- Consideration of search engine optimisation.
- Self-review:
 - o areas for consideration:
 - quality in comparison to similar websites
 - suitability for audience and purpose
 - meeting client requirements
 - legal and ethical constraints
 - consistency
 - readability
- Publishing the website.

C3 Testing

- Functionality testing:
 - o test plan
 - o areas, to include:
 - links
 - user interactivity
 - responsive to different screen sizes.
- Usability testing:
 - o user testing audit
 - o areas, to include:
 - accessibility
 - logical navigation
 - clarity of information
 - user experience.

Assessment criteria

Learning aim A: Understand how the principles of website development are used to create effective websites

Pass	Merit	Distinction
A.P1 Undertake research which shows adequate understanding of how the principles of website development are used to meet a specific purpose, using partially relevant examples. A.P2 Produce a site map that partially meets the client's requirements.	A.M1 Undertake research which shows a good understanding of how the principles of website development are used to meet a specific purpose, using mostly relevant examples. A.M2 Produce a site map that mostly meets the client's requirements.	A.D1 Carry out effective research to demonstrate a thorough understanding of the principles of website development and how to comprehensively meet the client's requirements, using pertinent examples.

Learning aim B: Explore website design skills and techniques to meet client requirements

Pass	Merit	Distinction
B.P3 Produce adequate wireframes and visual designs for a specific purpose. [SP-C&I] B.P4 Use asset management techniques to develop assets that partially meet the client's requirements. [SP-C&I]	B.M3 Produce mostly effective wireframes and visual designs for a specific purpose. B.M4 Use asset management techniques to develop assets that meet most of the client's requirements.	B.D2 Make effective use of website design skills to develop designs and assets that comprehensively meet the client's requirements.

Learning aim C: Develop a website to meet client requirements

Pass	Merit	Distinction
C.P5 Use tools, techniques, processes and testing to produce a website that partially meets the client's requirements. [SP-C&I]	C.M5 Use tools, techniques, processes and testing to produce a website that meets most of the client's requirements.	C.D3 Use tools, techniques, processes and testing to produce a website that comprehensively meets the client's requirements.

Essential information for Pearson Set Assignment Briefs (PSAB)

Pearson sets the assignment for the assessment of this unit.

The PSAB will take 15 hours to complete.

The PSAB will be marked by centres and verified by Pearson.

The PSAB will be valid for the lifetime of this qualification.

Assessing the PSAB

You will make assessment decisions for the PSAB using the assessment criteria provided.

Section 1 gives information on PSABs and there is further information on our website.

Further information for teachers and assessors

Resource requirements

For this unit, students must have access to resources that will enable them to develop the skills and techniques to design and develop websites, including:

- wireframing tools
- software and apps to create visual styles and visual representations
- equipment and software to create and prepare assets
- software tools to develop a website.

Essential information for assessment decisions

Learning aim A

For distinction standard, students will show a thorough understanding of how different websites combine principles of website development to meet their purpose. Students will also analyse the impact of the use of these principles on the user. Students will draw on pertinent examples and consider positive and negative outcomes.

Students will conduct accomplished research to underpin their planning, including effective research into existing websites, possible content for the website and legal and ethical constraints. A detailed site map will be annotated to clearly show how the proposed website will meet the client requirements.

The response will be considered and well-structured and relevant technical vocabulary will be used accurately.

For merit standard, students will show good understanding of how different websites employ principles of website development to meet their purpose. Students will also explain the impact of the use of these principles on the user. Understanding will be supported by some mostly relevant examples from the chosen websites.

Students will conduct mostly effective research to underpin their planning, including relevant research into existing websites, possible content for the website and legal and ethical constraints. A site map will be annotated to show how the proposed website will meet most of the client requirements.

The response will have an appropriate structure and some relevant technical vocabulary will be used.

For pass standard, students will show adequate understanding of how different websites employ some principles of website development to meet their purpose. Understanding will be supported by some partially relevant examples from the chosen websites.

Students will conduct adequate research to underpin their planning, including some research into existing websites, possible content for the website and legal and/or ethical constraints. A site map will show how the proposed website will meet some of the client requirements.

The response will be detailed, although it may lack a coherent structure and it may include some inaccuracies.

Learning aim B

For distinction standard, students will make accomplished use of wireframing tools and techniques to produce effective wireframes. Effective designs for the visual style of the website and representations of the web pages will demonstrate thorough understanding of the client's requirements and user needs.

Assets will be created, sourced and prepared through effective use of asset management techniques. The assets will have clear audience appeal and will comprehensively meet the client's requirements.

For merit standard, students will make good use of wireframing tools and techniques to produce mostly effective wireframes, successfully achieving the result for the specific purpose. Appropriate designs for the visual style of the website and representations of the web pages will demonstrate good understanding of the client's requirements and user needs.

Assets will be created and sourced through good use of asset management techniques. The assets will have appropriate audience appeal and meet most of the client's requirements, although one or two requirements may be missed.

For pass standard, students will make basic use of wireframing tools and techniques to produce adequate wireframes. Straightforward designs for the visual style of the website and representations of the web pages will demonstrate partial understanding of the client's requirements.

Assets will be created and sourced through basic use of asset management techniques. The assets will have some appropriate audience appeal and will meet the key requirements of the client but will not meet other requirements of the client.

Learning aim C

For distinction standard, students will make creative use of tools and techniques to build a website that meets all of the client's requirements. Effective understanding of web standards will be demonstrated through the development of a consistent and accessible website.

Students will conduct effective functionality and usability testing. Students will use the outcomes of the testing and a thorough self-review of their website to make considered refinements to the final website.

UNIT 3: WEBSITE DEVELOPMENT

For merit standard, students will make good use of tools and techniques to build a website that meets most of the client's requirements, although one or two minor requirements may be missed. Students will demonstrate good understanding of web standards through the appropriate use of accessibility features that clearly meet the requirements of the brief.

Students will conduct appropriate functionality and usability testing. Students will use the outcomes of the testing and a self-review of their website to make appropriate refinements to the final website.

For pass standard, students will make basic use of tools and techniques to build a website that meets the key requirements of the client but will not meet other requirements of the client. The website will be functional, although there may be some performance issues.

Students will provide evidence of straightforward functionality and usability testing. Students will use the outcomes of the testing and a self-review of their website to refine the final website.
